Real Estate for Sale.

FARM LANDS for SALE.—The ILLINOIS CENTRAL RAILROAD COMPANY is now prepared to bell about TWO MILLIONS OF ACRES of

sell about TWO MILLIONS OF ACRES of

FARMING LANDS.

IN TRACTS OF FORTY ACRES AND UPWARD,
On Long Credits, and at Low Rates of Interest.

These Lands were granted by the Government to aid in the
construction of this Railroad, and are among the richest and
most fertile in the State. They extend with the Road, from
Chicago on the north-cast to Cairo at the south, and thence
to Oslens and Dunleith in the extreme north-western part of
the State. Most of these Lands lie immediately on, and within
ais mites of the Road, and none are more than fifteen miles distant from it, hence, ready and cheap facilities are furnished for
transporting their products to any of the Eastern or Southern
markets. The gust increase of population by immigration, &c.,
and the consequent rapid growing home demand for every kind
of farm and garden produce.

In the northern and central parts of the State, prairie hards
predominate, interspersed with magnificent groves of one and other tumber; in the southern, the timber is more abundant,
and exceedingly valuable.

ether timber; in the southern, the timber is more abundant, and exceedingly valuable.

The soil is a dark, rich mould, from one to five feet in depth, is gently rolling and peculiarly fitted for graving cattle and sheep, of the cultivation of wheat, Indian corn, etc. The air is pure and braving, the climate more healthy, mild and equable than that of any other part of the Union; while fiving sixenans and springs of excellent water abound.

Economy is cultivating and great productiveness are the well known characteristics of Illinois lands. Trees are not required to be cut down, atungs grubbed, or stone picked off, as is generally the case in cultivating new land in the older States. The first crop of Indian corn, planted on the newly-bracker sod, usually repays the cost of plowing and fencing.

Wheat sown on the newly-braned sod is sures to yield very large profits. A man with a plow and two yoke of oven will break one and a half to two seres per day. Contracts can be made for breaking ready for corn or wheat, at from \$2.10 \times 50 per acre. By judicious management, the land may be plowed and fenced the first, and under a high cate of cultivation the second year.

Corn, grain, cattle, etc., will be forwarded at reasonable rates.

second year.

Corn, grain, cattle, etc., will be forwarded at reasonable rates
to Chicage, for the Eastern, and to Cairo for the Southern

corn, grain, cattle, etc., will be forwarded at reasonable rates to Chicago, for the Eastern, and to Cairo for the Southern market.

Bituminuus Coai is extensively mined along the Road, and supplies a cheap and desirable fuel, being furnished at many points at \$1 50 to \$4 per tun. Wood can be had at the same rate per cord. Extensive, quarries have been opered in the southern part of the State, near the line of this Road, of Building Blome of excellent quality—and have which can be had for it the more than the expense of traingertation.

The Government lands, in the Land Blates, having renerally hern withdrawn from market, endigenist from the Eastern States and Europe can be accommodated by this Goopany with valuable Farms, at the old prices and terms, which, in all probability, will double in value within twelve months.

When those lands are restored to market, persons who think of actting on them, of in Minneouts, should bear in mind that the Lands of this Company, at the prices for which they are sold, are better investments than those in other States of Territories more remote from market, at Government prices for the reason that the expense of transporting the products of the latter to market will always be a heavy drawback on them, and after a few years' cultivation they require manering, which is not the case with Illinois lands.

The came remarks hold good in relation to the lands in the Territories of Kansas and Nebraska; for although vacual lands are carried either in wagons, or interrupted water communications increases the expenses of transportation, which must be borne by the actiters in the reduced of the states are carried either in wagons, or interrupted water communications increases the expenses of transportation, which must be borne by the actiters in the reduced price of their products; and to that extent precisely are the incomes from the farms, and of course on their investments annually and every year reduced.

The great fertility of the lands now effected for sale by this feoning of the p

Bready famed Farm Buildings, which can be set up in a few days, can be obtained from responsible persons.

They will be 12 fee: by 20 feet, divided into one living and three bed rooms, and will cost complete, set up on ground chosen anywhere along the road, \$250 in each, exclusive of transportation. Larger buildings may be contracted for at proportionate rates. The Company will forward all the materials for such buildings over their road promptly.

It is believed that the price, long credit, and low rate of interest charged for these lands, will enable a man with a few hundred dollars in each and ordinary industry to make himself independent before all the purchase money becomes due. In the mean time, the rapid settlement of the country will probably have increased their value fear or five fold. When required, an experienced person will accompany applicants, to give in formation and sid in selecting lands.

Circulars, containing numerous instances of successful farming, signed by respectable and well-known farmers living in the high-behood of the railroad lands, throughout the State—also the cost of feacing, price of cattle, expense of harvesting, thrashing, etc., by contract—on any other information—will be cheerfully given on application, either personally or by letter, jost English Freeshy to Gentral Railroad Company.

Office in Illinois Central Railroad Company.

Office in Illinois Central Railroad Company.

GREAT AUCTION SALE

REAL ESTATE,

AT CLEVELAND, OHIO,

OR TUESDAY, Nov. 25, 1858.

The subscriber will ofter for sale, through Mearn. O. CUTTER 4 SON Anctioneers, on TUESDAY, the 25th day of November next, on the premises, or, if the weather should prove unfavorable, at the Melodeon, on Superior-st., 990 Lots in Central Tract in the City of Cleveland, numbered as follows: 44 to 251 inclusive, and 25t to 1,000 inclusive.

Also, 187 Lots in College Tract, numbered as follows: 35t to 458 inclusive, 601 to 622 inclusive, 627 to 646 inclusive, and 651 to 732 inclusive.

Central Tract, which contains about 100 acres, located near the heart of the city, has been laid out with a view to accommodate manufacturing establishments and for commercial purposes. The nature of the soil is such as to afford a good foundation for the heaviest class of buildings, without any preparation or expense. It has extensive Canal and River fronts, with ample water in the river for vessels and steamers, such as are usually employed in the navigation of the Lakes, and will speedily be brought into use for the purposes above mentioned, if not for the General Depot grounds of the Railroads terminating at Cleveland.

The Lots in College Tract which will be offered are convenient as the Machine Shows of the Cleveland and Mahoning Rail-

The control of the co

shops, and concentrate their business at this point. The canals, the trade of which seeks an outlet at this point, are 674 miles in length.

The Railroads and Canals terminating here, and other Railroads, the trade of which centers here, are not less than 3,000 miles in longth, and render tributary to the trade and growth of Cleveland a territory equal to the whole State of Ohio. There are already leasted here, and in encessful operation, numerous and extensive manufacturing certablishments employing a large capital, and giving employment to many men, but as the attention of our capitalists and leading men has not yet been turned in that direction, our manufacturies are yet in their induce; It is generally or needed that as a manufacturing point Cleveland has as vantages superior to any of the Lake cities, and equal if not superior to the cities on the Ohio all things being taken into account. The reasons for this view are:

1st. Posimity to the coal fields and from mines of Ohio and Pennsylvania, which embles not operate the raw material from that direction cheapers than other Lake cities.

2d. It is the nearest point at which the copper and iron of the Lake region and the fram one of Canada and Lake Repertor region and the fram one of Canada and Lake region and the Canadas than any other Lake city.

4th. It has reperine advantages for the distribution of manufactured articles by meson of railroade and canals which penetrate the indexion in various directions, and by reason of manufactured articles by meson of railroade and canals which penetrate the indexion in various directions, and by reason of manufactured articles by meson of railroade and canals which penetrate the indexion in various directions, and by reason of manufactured articles by meson of railroade and canals which penetrate the indexion in various directions, and by reason of manufactured articles by meson of railroade and canals which penetrate the indexion in various directions, and by reason of manufactured articles by meson of railroade and
